

BudgetDifferent

*An application that shows a different
side to money!*

The Concept

BudgetDifferent was created to understand the true value of money that you spend on a monthly basis. The application gives you the ability to:

- Create, edit, and delete individual monthly budgets
- Create and delete individual expenses within the monthly budgets
- Display the expense information in graphs
- Convert the expenses into item equivalents

Create Budget Item

This page is unique because the second dropdown populates with different options based off of the selection in the first dropdown.

The screenshot shows a web application interface for creating a budget item. At the top, a purple header bar contains the text "BudgetDiffernt" and a "Home" link. Below the header, the main content area has a title "Create a Budget Item" in purple. The form is centered and contains a "Category" dropdown menu with a list of options: "Food", "Shopping", "Investments" (highlighted in blue), "Medical", and "Recurring". Below the category dropdown is an "AMOUNT" input field. At the bottom of the form are two buttons: "Submit" (blue) and "Cancel" (light blue).
